Figure 1 is a line graph showing the stability of the anti-IL-12 monoclonal antibody. The Y-axis represents 'Remaining Immunoreactivity (%)' from 0 to 100. The X-axis represents 'Standing Time (h)' from 0 to 24. The graph shows a steady decline in immunoreactivity over time, starting at 100% at 0 hours and reaching approximately 35% at 24 hours. Error bars are shown for each data point.

Standing Time (h)	Remaining Immunoreactivity (%)
0	100
1	98
3	95
6	85
9	80
24	35
